

SAVOX

SC 3000 Kit 1 IR IR Camera, Audio

SAVOX SearchCam 3000 is a state-of-the-art technical search camera designed to handle the full range of rescue scenarios: locate victims trapped in collapsed buildings, under water inspections, vehicle extrication and many other incidents.

Its submersible camera head with hi-power LED lighting provides clear picture even in large underground cavities. The SearchCam helps the team to quickly detect the trapped victims and ultimately extract them. The integrated two-way audio capability allows rescuers to communicate directly with the victim. SearchCam 3000 Kit 1 IR comes with the standard-length telescopic tube set and IR video camera head. Long tube set and Color camera are available as optional, and they can be found in the Kit 1 Color and Kit 2. See corresponding product pages for details.

Key benefits:

- Quick-disconnect camera head - switch from Color to Infrared (Color camera optional)
- Records video, sound and still images
- Waterproof camera head – submersible up to 75 feet (23 meters)
- Camera head with 240° articulation and 280° total field of vision
- Automatic head centering assists in extraction from a void
- Interchangeable tube sets – camera extends from 92 inches to 223 inches (234 cm to 566 cm)
- Internal cable management reduces snagging and hang-ups
- Hot swappable batteries – no need to power down the unit for battery change
- Clear synergy with SAVOX Delsar Life Detector as the same batteries and charger are used in both systems.
- Carry sling solution included
- Controls for the key features located in the pistol grip for ease of use
