

# SAVOX

## Rescue Probe

SAVOX Hardline Rescue Probe is a watertight and shock resistant microphone built in cylindrical stainless steel housing used for locating and communicating with trapped victims in a structural collapse. Used in conjunction with other SAVOX Hardline equipment to form an entire intrinsically safe approved hardline victim location system, the probe can be deployed between single or multiple rescue teams and is a great tool for first responders.

### Key Benefits

- Intrinsically safe approved when used with SAVOX confined space command modules Full-duplex, two-way voice communication  
Increases first responder capabilities Expands SAVOX Hardline systems
- Will fit through a 2" bore-hole
- Multipurpose and easy to set up and deploy
- Can be operated by a single or two-person team
- Multiple systems can be deployed in the same area without causing interference in communication
- Can be used in conjunction with Search Dogs
- Private system does not allow outside monitoring
- Can be lowered into a void or shaft using couplers & rope probe can remain with a trapped victim(s) during long operations
- Watertight & water submersible
- Stainless steel construction
- Omni-directional microphone

Market Segment	Public Safety
Size L	160 mm
Size H	40 mm
Weight (text)	660 g
Acoustic Search Sensor	Yes

Product code	0103-02-006
Size W	40 mm
Housing Material	Stainless Steel
Ex/IS	ATEX / IECEx
Two-way Victim Communications	Yes

Full-duplex, Two-way Voice  
Communication

Yes
